- A military industry, believed to be a fuel factory for jet airplanes, is installed in the buildings of a former alcohol factory in Timisoara.
- 2. The factory is composed of: the distillery, a one-story building, 80 by 35 meters, and 15 meters high; a corridor containing pipelines which connects the distillery with a depot; and a depot which contains 10 cisterns with a capacity of 500 cubic meters each.
- 3. In the yard there is a masonry building, 70 by 32 meters. Across the driveway of this building are the administration offices. In the past, the main floor of the masonry building was used as a grain storehouse and the cellar was used to store corn exclusively. Also there was a dumping ground in the courtyard for molasses produced by distilling alcohol. The molasses was sold to the peasants.
- 4. It is not known what raw materials are used to make the new product, the products are used for military purposes.
